**** Transforming Europe's healthcare systems-where should change happen? ****

With Europe's healthcare systems at a critical junction, are current healthcare reforms missing opportunities to improve quality, whilst reducing cost? Will personalised medicine and prevention strategies deliver efficiency-or divert resources better spent on traditional frontline services?

Gathering together a group of influential healthcare stakeholders, our Healthcare in Europe event will discuss the future of healthcare reform.

Join us on March 17th in Geneva to:

- Hear from 26 inspiring speakers from across Europe including Belgium, Finland, Spain, France, India, Switzerland, and the UK
- Learn from the frugal innovators-hear a case study from Vishal Bali, CEO of Fortis Hospitals, one of India's leading private hospital chains
- Network with 120+ influential healthcare stakeholders from government, healthcare providers, suppliers, patient groups and NGOs

Places are limited to allow for optimal networking opportunities, with special rates also available for healthcare providers.
